Fire Safety Awareness (Adult Residential Care)

Employer and Employee Responsibilities

Page 4 of 15

Everyone has a responsibility for fire safety but your workplace will have a designated person - referred to as the responsible person - who has overall management responsibility for fire safety and compliance with fire safety regulations in your workplace.

In a residential care setting the responsible person will usually be the registered care home manager or owner, but in a large care home it could be someone who has a dedicated fire safety compliance role.

Additional trained staff, referred to as Fire Wardens or Fire Marshals, may be trained to carry out fire safety duties and checks.

The Responsible Person
The responsible person is the person who has overall local responsibility for fire safety and compliance with fire safety regulations in your workplace.

Our Fire Safety Awareness online training course ensures anyone that passes the final assessment is compliant with the Regulatory Reform (Fire Safety) Order 2005, the Fire Safety (Scotland) Regulations 2006 and the Fire Safety Regulations (Northern Ireland) 2010.

Fire safety awareness training is a legal requirement for all staff members and volunteers, whether full or part time, temporary or permanent. Fire Safety Awareness training must be given when they are first employed and periodically thereafter. The training identifies fire safety concerns and outlines measures that apply in adult residential care settings.

PURCHASING FOR YOUR ORGANISATION

If you are buying for your organisation rather than for yourself, it is simple for you to add learners, assign training and print certificates. You will have a dashboard to monitor learner progress and attainment.

Our training licences **don't expire** and are only assigned to a learner the first time they launch the training. Substantial discounts are applied to bulk purchases and annual licences are also available.

The course has been accredited by the CPD Certification Service and approved by RoSPA.

The assessment is generated from question banks so that the questions change each time a candidate takes the assessment – making the training suitable for initial and refresher training.

There is no limit on the number of attempts at the assessment and informative feedback is given so candidates can learn from their incorrect responses. A certificate with the CPD and RoSPA logo, is available for download on successful completion of the assessment.
