This IATP accredited online Asbestos Awareness training provides learners with the information needed to avoid work that may disturb asbestos or bring you in contact with asbestos and the risks associated with Asbestos Containing Material (ACM).

Regulation 10 of the Control of Asbestos Regulations 2012 states that every employer must ensure that any employee that is, or is liable to be, exposed to asbestos, or supervises such employees, is given adequate information, instruction and training to ensure they can safeguard themselves and other employees and carry out their work effectively.

This course is for anyone who may be exposed to asbestos as part of their work and needs understand the dangers so they can avoid any work which may disturb asbestos.

The approximate duration of this training is 1 hour.

PURCHASING FOR YOUR ORGANISATION

If you are buying for your organisation rather than for yourself, it is simple for you to add learners, assign training and print certificates. You will have a dashboard to monitor learner progress and attainment.

Our training licences **don't expire** and are only assigned to a learner the first time they launch the training. Substantial discounts are applied to bulk purchases and annual licences are also available.

The course has been accredited by IATP.

The course assessment is generated from question banks so will change each time it is taken. A certificate, with the IATP logo, is available for download on successful completion of the assessment.

ENGAGING, RELEVANT, COST EFFECTIVE TRAINING

Asbestos Awareness (Category A)

ASBESTOS TYPES AND PROPERTIES

- What the term asbestos refers to
- The colour, nature and name of three common types of asbestos
- The desirable and undesirable properties of asbestos

HISTORY OF THE USE OF ASBESTOS IN THE UK

- The history of the use of asbestos in the United Kingdom
- When the harmful effects of asbestos became apparent
- When asbestos consumption reached its peak in the UK
- When the different asbestos types were banned from use in the UK

THE HEALTH EFFECTS OF ASBESTOS

- Why the properties of asbestos cause it to have such an adverse effect on health
- The primary cause of asbestos-related diseases
- The reasons for the increasing numbers of asbestos-related deaths
- Why it can take decades for symptoms of asbestos-related diseases to appear
- The main types of asbestos-related disease and the parts of the body they effect
- Why there is an increased risk of lung cancer for asbestos workers who smoke
- Who is at the most risk from asbestos disease, including from secondary exposure

ASBESTOS AND ACMS IN BUILDINGS AND PLANT

- What is meant by ACMs
- The difference between **asbestos** and **ACMs**
- The uses and likely occurrence of asbestos and ACMs in buildings, equipment, plant etc
- When the use of asbestos and ACMs is most likely to have occurred
- What is meant by **friability**
- The conditions under which various ACMs will release fibres

IMPORTANT ASBESTOS-RELATED LEGISLATION

- The principal legislation that aims to protect people in the workplace
- Specific asbestos-related legislation

ASBESTOS SURVEYS AND REGISTERS

- The purpose of asbestos surveys
- Two types of asbestos survey and when they are needed
- The information that a survey should include
- Where the information gathered in a survey is recorded

DEALING WITH AN EMERGENCY

- The general procedure to follow if you discover or damage a suspected ACM
- What constitutes an asbestos emergency and how to recognise it
- The general procedures to be followed if there is an uncontrolled release of asbestos into the workplace

AVOIDING THE RISKS POSED BY ASBESTOS

- The things that you can do to avoid the risks posed by asbestos
