#### 5. The right to restrict processing

There are situations where the right to erasure does not apply but a person can be entitled to restrict the use of data.

Where processing is restricted, a data controller is permitted to store the personal data, but they must not process it.

The data controller can retain just enough information about the individual to ensure that the restriction is respected in future.

**Condition 1**

**Condition 2**

**Condition 3**

**Condition 4**

**4**

Data subjects have the right to restrict the processing of their personal data if the data controller no longer needs the data for their original purpose, but the data are still required by the controller to establish, exercise or defend legal rights.
