

ENGAGING, RELEVANT, COST EFFECTIVE TRAINING

Dementia Awareness

**£15
ONLY**

Our online Dementia Awareness training explains what dementia is, the types of dementia and looks at the many different kinds of help that are needed by people with dementia.

If you are a carer or a care worker who supports individuals with dementia you need an awareness of the condition so that you can show compassion and understanding. You are likely to experience behaviour that you find difficult to understand and you need to know the best way to respond to that behaviour.

The approximate duration of this training is 2 hours.

PURCHASING FOR YOUR ORGANISATION

If you are buying for your organisation rather than for yourself, it is simple for you to add learners, assign training and print certificates. You will have a dashboard to monitor learner progress and attainment.

Our training licences **don't expire** and are only assigned to a learner the first time they launch the training. Substantial discounts are applied to bulk purchases and annual licences are also available.

The course has been certified by the CPD Certification Service.

The assessment is generated from question banks so that the questions change each time a candidate takes the assessment – making the training suitable for initial and refresher training.

There is no limit on the number of attempts at the assessment and informative feedback is given so candidates can learn from their incorrect responses. A certificate, with the CPD logo, is available for download on successful completion of the assessment.

ENGAGING, RELEVANT, COST EFFECTIVE TRAINING

Dementia Awareness

WHAT IS DEMENTIA?

- Why you need an awareness of dementia
- The prevalence of dementia
- The symptoms that are common to most types of dementia

ALZHEIMER'S DISEASE

- The prevalence of Alzheimer's disease
- What happens to the brain of someone with Alzheimer's
- Typical Alzheimer's symptoms and how they progress

VASCULAR DEMENTIA

- The prevalence of vascular dementia
- Changes in the brain that occur with three types of vascular dementia
- The symptoms of vascular dementia

FRONTOTEMPORAL DEMENTIA

- The prevalence of frontotemporal dementia
- What causes this type of dementia
- The symptoms of three different types of frontotemporal dementia

DEMENTIA WITH LEWY BODIES

- The prevalence of Dementia with Lewy Bodies
- The cause of the disease and how it relates to Alzheimer's disease and Parkinson's disease
- The symptoms of Dementia with Lewy Bodies

OTHER CONDITIONS RELATED TO DEMENTIA

- Other diseases that can cause dementia symptoms
- Health conditions that can look like dementia but are treatable
- Why it is important to recognise the early signs of dementia

MEDICATION

- Two types of medicines that are often prescribed for Alzheimer's disease
- Medicines used to treat other types of dementia

OTHER SUPPORT AND TREATMENT

- Distinguish between the medical model and the social model of disability
- Aspects of person-centred care
- Tools that can help a person with memory problems
- Techniques to help someone who has dementia to carry out day-to-day tasks
- How to help someone who has language difficulties
- The causes of challenging behaviour and ways to reduce it
- Professional non-drug therapies available to help people with dementia

PHYSICAL CARE NEEDS

- How you can support people with dementia

SOCIAL AND EMOTIONAL NEEDS

- The importance of exercise and meaningful activities
- The need for social interaction
- Why sex and intimacy may still be important for people with dementia
- People's need for independence, privacy, respect and freedom from fear

THE LAW AND DEMENTIA

- The articles in the Human Rights Act that are relevant to dementia care
- How the Data Protection Act applies in dementia care
- Other relevant UK legislation
