Our PAT Testing and Electrical Safety course is an introduction to PAT testing in any work environment. It is suitable for employees at any level of the business. PAT stands for **Portable Appliance Testing** and refers to the process of checking electrical appliances to make sure they are safe to use.

This training course is useful for business owners, health and safety managers, those responsible for PAT testing, and users of electrical appliances.

The approximate duration of this training is 1 hour and 30 minutes.

PURCHASING FOR YOUR ORGANISATION

If you are buying for your organisation rather than for yourself, it is simple for you to add learners, assign training and print certificates. You will have a dashboard to monitor learner progress.

Our training licences **don't expire** and are only assigned to a learner when they launch the training. Substantial discounts are available for bulk purchases.

Learners are able to download their certificate on successful completion of the online assessment.
